

eGRANTSM

Online Grant Application. Through a unique collaboration with the Center for Arts Management and Technology (CAMT) at the H. John Heinz III School of Public Policy and Management at Carnegie Mellon, Bromelkamp Company offers **eGRANT**, an unparalleled web-based application designed to maximize efficiency for foundations and their grant applicants/recipients.

eGRANT is designed to work with Bromelkamp's Pearl products, and most other data management solutions, so *you'll never type the same thing twice*. Overall, **eGRANT** improves efficiency for applicants and the foundation because it:

- **Reduces data entry time** by importing data from the electronic application directly into Pearl.
- **Reduces inappropriate/ineligible requests** through use of an eligibility quiz.
- **Supports efficiency** by permitting "cut and paste" functionality from other software programs.
- **Prevents run-on answers** through size limits in the answer fields.
- **Improves completeness** by prohibiting submission when required fields are incomplete.
- **Increases accuracy** by performing essential mathematical calculations.
- **Creates complete electronic application files** by permitting file attachments including multimedia.
- **Supports communication with applicants** via automated forms and letters, accessible status checks, information on review, award, payment schedules, and reporting requirements – all electronically.

As you've grown to expect with Pearl products, **eGRANT** is customizable to allow for the unique variations within your foundation's application process. It also includes functions for application revisions and grantee reporting. The easy-to-use format and accessible help text offer an efficient user interface to applicants and generate fewer questions to foundation staff. **eGRANT** even adjusts screen content depending on previous answers. For example, requests over a certain dollar amount can include additional financial or management questions, or requests for different programs can have different questions.

For added functionality you can implement additional modules:

- Application tracking – allows an applicant to check the status of their application at any time, reducing your need to respond to inquiries manually
- Committee/Panel review – gives online access to those reviewing the applications and allows them to submit comments and recommended grant amounts online.
- Fellowship review – allows for those who recommend fellowships to review applications on line, including the ability to view high-quality images.

Contact Bromelkamp Company today to learn more about how **eGRANT** improves your application process and related services.
